1 At a glance

Your account lets you **see** attendance and the roster for one unit — your class, team, section, or department. It cannot change anything, so you can explore freely without breaking anything.

You can

- ✓ See attendance for your unit, day by day
- ✓ See totals per person and per period
- ✓ Export attendance to a spreadsheet
- ✓ See the roster for your unit

You can't

- ✗ See other units
- ✗ Add, edit, or remove people
- ✗ Enrol fingerprints or manage scanners
- ✗ Change settings, accounts, or passwords

Your admin and super admin set up your account and can do everything in the right-hand list. Section 8 says who to ask for what.

1.1 Words used in this guide

Each institution can rename the dashboard's main words, so your screens may say *Students* or *Class* where this guide says *Member* or *Unit*. The meaning is the same.

Word	Meaning	A school might say
Member	A person whose attendance is recorded	Student
Unit	One place people scan — each unit has its own scanner	Class
Group	A set of units	Form, Grade, or Year
Period	A stretch of time you report on	Term
Scan	Placing a finger on the scanner	—

2 Signing in and finding your way

- 1 Open the dashboard address your admin gave you.
- 2 Enter your email and password.
- 3 Press **Sign in**.

There is no sign-up page and no "forgot password" link. If you can't sign in, ask your super admin to reset your password.

2.1 What you'll see

The menu shows only the pages your account can open:

- **Overview** — today at a glance: how many are present and absent, the attendance rate, and the latest scans
- **Attendance** — every record for your unit, with filters, totals, and export
- **Members** — the roster for your unit (your institution may call this page *Students*, *Employees*, or similar)

Pages update themselves within a few seconds when new scans arrive, so there's no need to reload.

2.2 On a phone

On a phone the menu becomes a bar along the bottom of the screen: **Overview**, **Attendance**, your roster, and **More**.

To keep the dashboard on your home screen like an app, press **Install app** at the bottom of the menu. On an iPhone, open the dashboard in Safari, tap the Share icon, then choose **Add to Home Screen**.

NOTE

For security, the dashboard signs you out after **10 minutes** without activity, and whenever you close the browser. Just sign in again.

The moon icon next to your name switches between light and dark mode.

3 Checking attendance

Press **Attendance**. A small padlock chip in the filter bar shows the unit your account is locked to.

Figure 1 The Attendance page. Screenshots in this guide use demo data in dark mode — your names, colours, and menu will differ.

The page has three tabs:

Tab	What it shows
Records	One row per person per day: date, name, ID, unit, period, time, and status. Where your institution records arrival and departure, both times share one row.
Summary	Present and absent totals, and the attendance percentage, for each unit and period.
By member	One row per person: days present, days absent, attendance rate, and when they were last seen.

3.1 Narrowing the list

The filters above the tabs apply to all three:

Filter	Use it to
From and To	Show one stretch of dates.
Period	Show one term or reporting period.
Member type	Show members or staff only, where your institution tracks both.
Status	Show only Present or only Absent records.
Members	Pick one or more people by name.

3.2 Reading a record

You see	It means
Present	They scanned that day.
Absent	They didn't scan on a day that counts. Added automatically each evening.
Time In and Time Out	Their first and second scans of the day, where your institution records arrival and departure.
Late badge	They arrived after the expected start time plus the grace period.
Early badge	They left before the expected end time minus the grace period.

NOTE

Nobody marks absences by hand. Each evening the system adds an **Absent** record for every active person who didn't scan, skipping holidays and days your institution doesn't track. If a scanner was offline, its saved scans upload later and correct those records.

4

Looking at the roster

Press **Members** to see everyone assigned to your unit, with their name, ID, and whether they are **Active** or **Inactive**. Search by name or ID, and use the status filter to include inactive people.

You can't edit the roster. If a name or ID is wrong, or someone is missing, tell your admin.

5

Exporting to a spreadsheet

- 1 Go to **Attendance**.
- 2 Set the filters you want — for example **From** and **To** for this month.
- 3 Press **Export CSV**.
- 4 Open the downloaded file in Excel or Google Sheets.

The file follows your filters and only ever contains your unit.

6

The scanner

Each unit has a fingerprint scanner with a small screen and a coloured light around the sensor. You don't manage it, but knowing what it shows helps you answer "did my scan work?" on the spot.

Ready. The clock, the device's name, and its connection.

Checking with the server — about a second.

Recorded. May also say **TIME IN** or **TIME OUT**.

Saved offline. It uploads by itself when the internet returns.

Not counted, e.g. a holiday, an untracked day, or already recorded today.

Scanned twice within a minute. Nothing to do.

Not recognised. Try again with the finger flat and still.

Known finger, no person linked on this device. Tell your admin.

Updating. Leave it powered on; it restarts by itself.

Light	Meaning
Solid blue	Ready and online
Solid purple	Ready, but no WiFi — scans are saved and upload later
Green flash	Scan accepted
Red flash	Not recognised
Breathing yellow	Waiting to be set up by an administrator
Breathing red	Installing an update — do not unplug

TIP

A scanner that has lost its internet connection keeps working. It stores every scan and uploads them when the connection returns, so an outage never costs anyone a day's attendance.

7 When something looks wrong

Problem	What to do
Someone is marked absent but was there	Ask what the screen said when they scanned. NO MATCH means the scan didn't count. Tell your admin — you can't edit records.
Everyone is absent on one day	The day may be missing from the holiday list, or the scanner was off all day. Tell your admin.
A person is missing from the roster	They haven't been added yet, or they're assigned to another unit.
You see no records at all	Your account may not be linked to a unit. Ask your super admin to check it.
You were signed out	Normal after 10 minutes without activity. Sign in again.

8 Getting help

You need	Ask
A new password	Your super admin
A name, ID, or roster change	Your admin
A scanner looked at	Your admin — say what the screen and light show
Access to a different unit	Your super admin
