4. Periods and holidays
5. Attendance
6. Year-end promotion
7. Shop duties
8. Accounts
9. Getting help

1. Introduction

As an admin you handle the day-to-day running of the system. This manual covers everything your role can do.

You can:

- View and manage the roster
- Manage periods and holidays
- View attendance and export it
- Run year-end promotion (schools)
- In a shop: manage clients, sales, catalog, loyalty, and reports
- View the list of dashboard accounts
- Change your own password

You cannot:

- Manage devices, or assign and delete scanners
- Run fingerprint enrollment
- Create, edit, or delete other accounts
- Change institution settings

Anything in that second list is a super admin task — ask yours.

TIP

This manual covers what your **role** can do. For guidance specific to your kind of organisation, read the matching type guide as well — the School, Office, or Shop manual.

2. Logging in

Open the dashboard URL, enter your email and password, and press **Sign in**.

To change your password, go to **Accounts** and press the key icon next to your own account.

3. Members

3.1 Viewing the roster

Go to **Members** to see everyone. Search and filter to find a person. The list shows name, ID number, group, unit, and status.

3.2 Adding one person

Add member → fill in ID number, full name, group, and unit → **Save**.

New members have no fingerprint. Ask a super admin to queue an enrollment job for them.

3.3 Importing a spreadsheet

Press **Import CSV** next to Add member. Download the template, fill in one row per person — ID, full name, unit — and upload it. A preview shows which rows are ready and which have a problem, such as a missing field or a unit that is not recognised, before anything is created.

Imported members start Inactive. Review the list and activate each one once a super admin has enrolled their fingerprint.

3.4 Editing and deactivating

Press the edit icon, update the fields, and save. To retire someone, set their status to **Inactive** — their history is kept and they stop generating absences.

3.5 Staff

If your organisation tracks staff separately, a **Staff** section appears and works exactly like Members.

4. Periods and holidays

4.1 Periods

Go to **Academic** (called **Periods & Holidays** in an office, and not present in a shop) to manage terms.

Add period → name, year, start and end dates → mark **Active** if it is the current one → **Save**.

Keep exactly one period active at a time. Attendance is tied to whichever period was active when the scan happened.

4.2 Holidays

Add holiday → label, start date, end date → **Save**. No absences are generated on those days.

Tick **Recurring** if it repeats on the same dates every year, such as Independence Day. Leave it unticked for dates that move, such as Easter.

TIP

Enter the whole period's holidays when you create the period. A missed holiday produces a full roster of false absences that somebody then has to explain.

5. Attendance

5.1 Viewing

Go to **Attendance** and narrow the records with the filters:

- **Date range** — from and to
- **Period** — a specific term
- **Member** — search by name
- **Unit** — one class, team, or section
- **Scan type** — present, absent, time-in, time-out

Time-in and time-out for the same person on the same day appear on one row.

5.2 Exporting

Apply your filters, press **Export CSV**, and open the file in Excel or Google Sheets.

NOTE

Absences are filled in automatically overnight for everyone active who did not scan, skipping holidays and — if that setting is on — weekends. You never mark anybody absent by hand. A scan that arrives late, from a device that was offline, corrects the record when it syncs.

6. Year-end promotion

Schools only. Promotion moves everyone from one grade or year group to the next.

1. Go to **Promotion**.
2. Review the preview and confirm the moves are right.
3. Press **Promote**.

IMPORTANT

This is irreversible. Export the year's attendance records before you run it.

7. Shop duties

In a shop, your role also covers the retail side: **Clients**, **Sales**, **Catalog**, **Loyalty**, and **Reports**. These are covered in full in the Shop Manual — ask your super admin for a copy if you do not have one.

In short:

- **Clients** — your customers. Phone number is required and must be unique.
- **Sales** — record what was sold, to whom, and by which staff member.
- **Catalog** — the products and services you sell, with prices and stock.
- **Loyalty** — reward rules, and issuing rewards to clients who qualify.
- **Reports** — takings, top clients, revenue by staff member, popular items, low stock.

8. Accounts

Go to **Accounts** to see the dashboard users for your organisation. Search by email and filter by role.

You can change **your own** password with the key icon next to your account. You cannot create, edit, or delete other accounts — contact a super admin.

9. Getting help

Problem	Who to ask
Someone needs a fingerprint enrolled	Super admin
A device is not working, or shows an odd screen	Super admin
A new account is needed, or a password reset for someone else	Super admin
A setting or label needs changing	Super admin
Attendance looks wrong for a whole day	Check holidays first, then ask your super admin to check the device
