Staff Manual

Viewing attendance and roster records for your unit

Teachers, supervisors, and staff
Version 2.0 | August 2026

Contents

1. Introduction
2. Logging in
3. Viewing attendance
4. Viewing the roster
5. Exporting
6. Changing your password
7. Getting help

1. Introduction

This manual is for teachers, supervisors, and staff who use the dashboard. Your account gives you **read-only** access to attendance and roster records for your assigned unit — your class, section, team, or department.

You can:

- View attendance for your unit
- View the roster for your unit
- Export attendance to a CSV file
- Change your own password

You cannot see other units, add or edit people, manage devices, or change any settings.

2. Logging in

Open the dashboard URL, enter your email and password, and press **Sign in**.

If you cannot log in, contact your administrator. Accounts are created by an admin or super admin — there is no self-registration.

3. Viewing attendance

Press **Attendance** in the sidebar, or in the bottom bar on a phone.

You will see the records for your unit. The table shows:

- Date of the scan
- Name and ID number
- Scan type — Present, Absent, Time-In, or Time-Out
- Time of the scan
- Period or term

Time-in and time-out for the same person on the same day appear on one row.

3.1 Filtering

Filter	How to use it
Date range	Pick a start and end date to show only that stretch.
Period	Pick a term to show only records from it.
Member	Type a name to narrow to one person.
Scan type	Show only Present, Absent, Time-In, or Time-Out.

4. Viewing the roster

Press **Members** to see everyone in your unit, with their name, ID number, group, and unit. You can search by name.

You cannot edit anybody's details. If a record is wrong, tell your admin.

5. Exporting

1. Go to **Attendance**.
2. Apply any filters you want — a date range, a period.
3. Press **Export CSV**.
4. The file downloads and opens in Excel or Google Sheets.

The export covers your unit only. For data from another unit, ask an admin or super admin.

NOTE

Absences are generated automatically overnight for anyone active who did not scan, skipping holidays and weekends where that is configured. Nobody marks absences by hand. If a device was offline, its scans upload later and correct the record.

6. Changing your password

Accounts → **find your own account** → **press the key icon** → **enter the new password** → **Save**.

If you have forgotten your password and cannot log in, contact your administrator.

7. Getting help

If something looks wrong, or attendance records are incorrect, contact your institution's admin or super admin.

For a scanner that is not behaving, tell your admin what the screen and light are showing — that is usually enough for them to identify it immediately.

Screen shows	What it means
Clock and device name	Normal, waiting for a scan
A name, then Present / Time In / Time Out	Scan recognised and recorded

Screen shows	What it means
A name and "Offline"	Recognised, but no internet. Saved, and uploads itself later.
"COOLDOWN" and a name	Same person scanned again within a minute. Normal.
"NO MATCH"	Finger not recognised. Ask them to try again.
A "queued" count under the clock	That many scans are waiting for the internet to return
"OTA UPDATE" / "Do not unplug"	Installing an update. Leave it powered on.

Light	Meaning
Solid blue	Ready, online
Solid purple	Ready, but no WiFi
Green flash	Scan accepted
Red flash	Not recognised
Breathing yellow	Waiting to be assigned by an admin
Breathing red	Installing an update — do not unplug

TIP

A scanner that has lost WiFi still works. It stores scans and uploads them when the connection returns, so an outage never costs you a day's register.
